

REFUELING FACILITY – WINGS PARK

Up till fairly recently, there has only been a very limited number of “key holders” to the fuel facility at Wings Park. In an initiative to make it more accessible to visiting pilots and the wider aviation community, all shareholders and other selected members of Wings Park are being trained and will be able to offer “refueling assistance”.

Should you wish to fly in and get fuel, please give Patrick Hill a phone call in advance to see if it is convenient for him to assist you or alternately he could put you in contact with someone who can.
